Image 1: SW-MOTECH with its new Legend Gear product line presents a versatile luggage system made from robust synthetic leather and coated canvas material, fit for a short cruise as well as extended weekend trips.

Image 2: The product line vintage design perfectly complements the ageless styling of current 'retro' bikes but also plays well with modern cafe racers' design.

Image 3: The elegant tank strap doubles as a design element and accessory bag holder.

Image 4: A military grade fastening system allows the easy attachment of additional accessory bags.

Image 5: The compact tank bags will be available in sizes from 3 to 5.5 liters. Depending on the model the tank bags come with strap fastenings (depicted above) or with magnet holders.

Image 6: A set of Legend Gear saddlebags can hold up to 27 liters of luggage and allows the fastening of additional accessory bags. For selected motorcycles – among others Ducati Scrambler, BMW R nineT and Triumph Boneville – a carrier system is available, that can be used on one or both sides of the motorcycle.

Image 7: As an alternative to model specific carriers a universal holder provides a secure fit for the Legend Gear side bags. Its fastenings fit nearly any motorcycle seat, recommending the holder for stock motorcycle seats as well as modified and custom bench seats.

Image 8: In addition to tank bags and saddlebags the Legend Gear portfolio contains tail bags with a capacity of up to 48 liters. While the 17.5 liter design variant doubles as a backpack, all tail bags will be equipped with a fastening system for accessory bags.
